APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

This temporary permit to change the point of diversion, place and manner of use of a portion of the waters of Las Vegas Wash as heretofore granted under Permit 65963, is issued subject to the terms and conditions imposed in said Permit 65963, and with the understanding that no other rights on the source will be affected by the change proposed herein. A substantial headgate and measuring device must be installed and maintained to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water under this proposed change at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined diversion rate and total combined duty of Permits 65962, 65963, 65964, and Temporary Permit 67409-T are 34.0 cubic feet per second and 4,000 acre-feet annually, respectively.

On a quarterly basis, the permittee must submit to the State Engineer a report describing the method of measurement and the amount of water diverted and consumed under Temporary Permit 67409-T.

Permits 65962, 65963, and 65964 for wetlands preservation were specifically issued subject to Permit 29814 and cannot infringe on the primary purpose of Permit 29814, which is to maximize Nevada's Colorado River return flow credit. Temporary Permit 67409-T is issued with this same condition regarding the Colorado River return flow credit.

The agreement made and entered into on July 18, 2000, by and between the Colorado River Commission of the State of Nevada and the Clark County Board of Supervisors, acknowledged by the State Engineer and part of the base water right file for Permit 65963, is extended to Temporary Permit 67409-T.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **September 6, 2002** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.2125 cubic feet per second, but not to exceed 25.0 acre-feet annually, and not to exceed a yearly duty of 5.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set

my hand and the seal of my office,

this 7th day of September A.D. 2001

State Engineer
